KM0 · Overall Concept

One spine · Three stations · Two wings — the intelligent mileage of a centennial railway

KM0

KM0 · Centennial Jing-Zhang AI Innovation Belt

The K0 Monument

Beside the old Qinghuayuan Station: mileage was measured from there in 1909; innovation is recounted from here.

Three stations

Departure (Dazhongsi, urban AI living) → Origin (campus-adjacent sourcing) → Acceleration (Zhongzhiyuan, garden full-stack).

Two wings

Zhongguancun Tech-Services Wing (capital & services) × Xiaoyue River Scenario Wing (testbeds & urban data).

Time posts

K1909 railway · K1984 Electronics Street · K2019 HSR dives underground · K2026 AI belt — one walk across three eras.

Honor system

Switchback Climbers' Honor Wall + smart mileposts: annual plaques for developers and agents.

Concept design within a provisional rough boundary (provisional_constraint). Not an official redline or approved plan. Geometry and metrics recomputable in EPSG:4548. Sources: official announcement & public reports (sources.json) | AI-generated concept

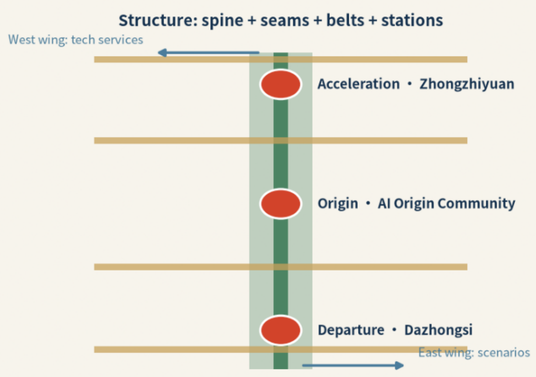

Three-Level Scopes & Land-Use Structure

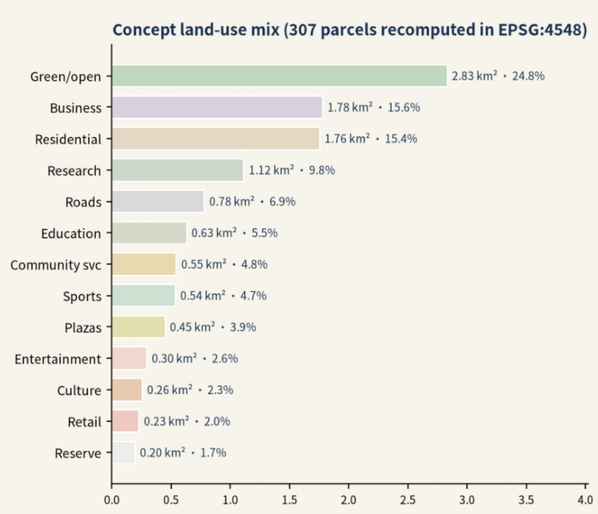

From the 43.6 km² research area to the 11.4 km² design area to the 368.4 ha key areas

KM0

零公里 KM0

Recount from here. In 1909 China's self-engineered railway began its count on the Jing-Zhang line; in 2026 the intelligent age restarts at a new Kilometer Zero beside Qinghuayuan. One spine, four seams, two belts, three stations — a 9.58 km Meridian.

三区两翼协同回路

Origin Station sources innovation and talent → Acceleration Station scales full-stack R&D → Departure Station productises; the Tech-Services Wing feeds capital, the Scenario Wing feeds testbeds.

用地概念构成

Green/open 24.8% | business/retail ≈18% | residential/community ≈20% | research/education ≈15% | roads 6.9% | plazas/sports 8.7% | reserve 1.7%. 307 parcels, topology-verified.

拆改留逻辑

Retain/renovate first for heritage and active innovation stock; new capacity in garden districts and underused plots. Concept ratios shown as strategy, not decisions.

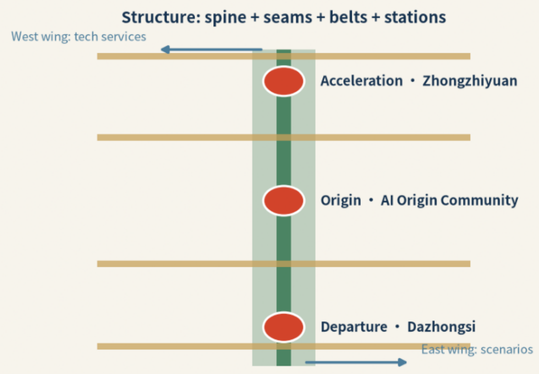

Three-Level Scopes & Land-Use Structure

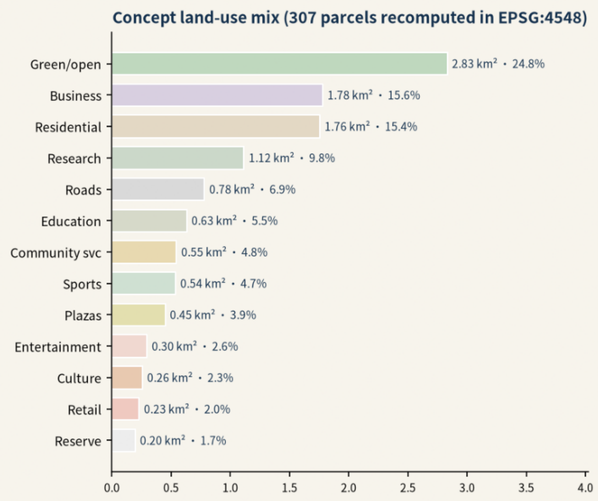

From the 43.6 km² research area to the 11.4 km² design area to the 368.4 ha key areas

KM0

Metrics • Area Recomputation • Evidence Chain

Every known metric is recomputed from submitted geometry in EPSG:4548 and matches metrics.json / visual/index.html

KM0

KM0 · Centennial Jing-Zhang AI Innovation Belt

Overall design area	Green & open ratio	Public-space ratio	Concept footprints
1,141.3 ha	24.8%	8.7%	79.0 万m²
polygon_area(site_boundary)	green_space / site_area	public_space / site_area	Σ footprints
metric:site_area_sqm | confidence medium	metric:green_ratio | confidence low (concept)	metric:public_space_ratio | confidence low (concept)	metric:building_footprint_area_sqm | confidence low (concept)

Concept GFA magnitude	Meridian spine length	Slow network length	Smart-milepost nodes
522 万m²	9.58 km	14.6 km	12
Σ footprint × concept floors	centerline length	spine + 4 seams	count(SCENARIO_NODE)
metric:concept_floor_area_estimate_sqm | confidence low (concept)	metric:heritage_spine_length_m | confidence low (concept)	metric:slow_network_length_m | confidence low (concept)	metric:scenario_node_count | confidence medium

Pending official data (unknown, value=null): FAR · building height · statutory GFA — dependent on unpublished regulatory controls; recompute on release.

Four gates: deterministic validation / spatial review / visual packaging / professional evidence — status and hashes in self_check.json and manifest.json.

Concept design within a provisional rough boundary (provisional_constraint). Not an official redline or approved plan. Geometry and metrics recomputable in EPSG:4548 | Sources: official announcement & public reports (sources.json) | AI-generated concept

Slow Mobility × Blue-Green Public Space

9.58 km Meridian greenway + four seams + two river corridors — turning breakpoints into chainages

四座朝圣地标

Departure Hall → the K0 Monument → Switchback Slope Honor Wall → Platform Future. Annual plaques, term rotation, public selection — open-source governance made physical.

场景开放运营

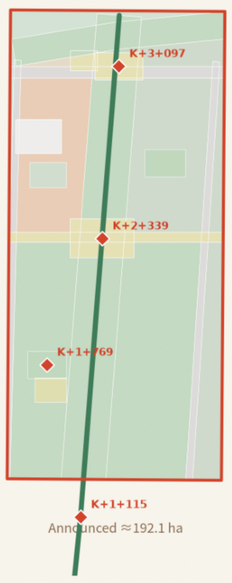

12 scenario cards on 12 smart mileposts; five industrial test scenarios start enclosed; pipeline: apply → sandbox → human review → showcase.

Three Stations • Key-Area Concept Designs

Positioning + structure + renewal + mobility + public space + scenarios + risks (directional concepts on provisional geometry)

KM0
KM0 • Centennial Jing-Zhang AI Innovation Belt

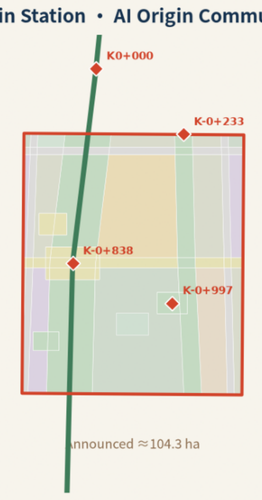

Acceleration Station • Zhongzhiyuan

Design moves

- Garden valley + full-stack R&D courtyards
- Embodied-AI outdoor test field SC-10
- Xuezhiyuan micro-centre • Qinghe hub link
- Reserve land for national platforms

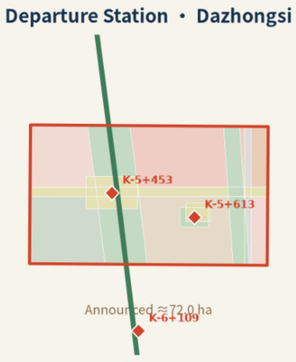

Origin Station • AI Origin Community

Design moves

- K0 monument + open-source release gallery
- Wall-less campus interface • low-disturbance renewal
- Wudaokou / Qinghua East dual-station integration
- Enterprise copilot • talent living rooms

Departure Station • Dazhongsi

Design moves

- Zhihui Plaza + four-quadrant pedestrian links
- AI-native consumption field SC-02/09
- Line 12/13 interchange connection
- Juesheng Temple heritage × data sandbox

可复算证据链

Official sources → provisional boundary → geometry engine (EPSG:4548) → metrics.json → figures+HTML → four-gate self-check PASS. The three core visual metrics are known and match visual/index.html.

风险与边界声明

Eight-dimension risk matrix (data privacy highest at 4, with mitigation and human review); all spatial content conceptual; no non-public data; the author bears responsibility for AI-generated content.
